

ARK®zip 65mm - system construction

Outer profile	ARKzip 65.400 and 65.435 in 0.9mm aluminium and 0.7mm steel. Refer to ARK product data sheet 09-ARK-Prod-ARKzip 65.400
Insulation	Glass or rock mineral wool quilt to BS EN 13162 and BS3533:1981, non-combustible Euroclass A1 to BS EN ISO 13501-1. Thickness as System Performance table below, Thickness as System Performance table below, based upon 1.5m average spans and spacer brackets at 1m centres.
Spacer	80mm and 140mm aluminium halter with bracket and rail spacer system. 1.5mm galvanised steel brackets to depth as System Performance table below, max spacing 1m. 1.25mm galvanised steel rail, interlocking end joints, bracket stability braces at 20m max spacing on brackets of 250mm and above. Fix to 2mm galv steel 20/30/40/30/20mm x 60mm tophat stools located under the vcl. All fasteners to be 5.5mm dia plus 16mm dia sealer washers
VCL and air barrier	250gsm reinforced polyethylene membrane. Laps sealed using 1.5mm x 20mm butyl sealant, 2No strips. VCL robustly sealed to perimeters and penetrations. Use solid profiled filler blocks bedded in gun applied sealant under and over liner at eaves/ ridge. Bed VCL and clamp to fillers using an angle strip. Lay vcl parallel to liner for lap support. Seal side laps over rib for support. Alternative self adhesive 0.6mm foil faced vcl, prime ribs.
Acoustic insulation	30mm x 115mm black or white tissue faced 45kg/m ³ rock fibre strips
Liner	ARKliner 32.1000.200-0.65mm perfo. Pan perforated 45% open area. Refer to ARK product data sheet 30-ARK-Prod-ARKliner

ARK®zip 65mm - twin skin – acoustic roof: 29-c-ARK-Sys-09/2016	
ARK®zip 65mm - system data	
Non-fragility	Non Fragile Class B to ACR[M]001. Refer to ARK product data sheet 30-ARK-Prod
Fire properties	Insulation is EuroClass A1 to BS EN ISO 13501-1, non combustible Liner Class 0, Topsheet Class AA to National Standards (Refer to ARK product data sheets 09-ARK-Prod and 30-ARK-Prod)
Minimum pitch	Nominal 1.5°.
Guarantees and Warranties	ARK Silver and ARK Gold. Refer to ARK technical data sheet 05-ARK-Tech “Warranties and guarantees”
Curve options	Natural curve to 40m minimum radius. Factory curve radius is profile and material dependent, consult ARK.
Fasteners, sealants	Refer to ARK product data sheets 09-ARK-Prod-ARKzip 65.400&430 and 30-ARK-Prod-ARKliner perfo
Airtightness	ARKzip systems with a sealed vcl are inherently airtight and contribute to low building air leakage rates. The vcl is the air barrier and vapour control layer and has sealed side and end laps and robust sealing at eaves, ridge and verge. Penetrations (SVP etc) must be sealed into the vcl as well as into the outer sheet. The most robust vcl is a self adhesive membrane with self sealing laps and the ability to bond to perimeters and penetrations. These tend to be the most resistant to damage and better in the long term.
Installation key requirements	<p>Insulation must be dry when covered by the outer sheet.</p> <p>Insulation must fill the insulation cavity with minimal gaps around the spacer</p> <p>Fasteners for liner and spacer brackets are carbon steel self drillers and must have 15/16mm diameter sealed washers</p> <p>Liner fixings are in every trough at end laps, ridges and eaves, alternate troughs at intermediate purlins.</p> <p>Exposed fasteners are 304 grade stainless steel with coloured heads and 16mm diameter sealer washers, or aluminium rivets.</p> <p>Spacer brackets must have 2 fasteners per bracket.</p> <p>Halter brackets have 2No 304 grade stainless steel fasteners plus an isolating EPDM seal.</p> <p>Spacer brackets max 300mm from joggle joint</p> <p>Isolate aluminium from galvanised steel</p> <p>The vcl must be sealed all round, including over and under fillers bedded in sealant</p> <p>ARKzip requires a single fixed point per sheet, normally at the ridge or crown of a curved roof.</p> <p>Zip sheets as laid.</p> <p>Increase halter gauge by 5mm for natural curve sheets (Note impact on module if rooflights to be installed)</p> <p>Set zipping tool to 20mm rib top diameter</p> <p>Close ribs by hand pliers at each sheet end before zipping.</p> <p>Protect pre-painted sheet finishes with a rib cloth</p> <p>Walk on ARKzip ribs</p>
