

Reynolux[®]
Roof

Discover new
possibilities
for your roofs!

Dedicated to your Success

Achieve new freedom and new customers thanks to Reynolux®!

The simple processing of Reynolux® lets you create luminous colours in original shapes. The optimal adhesion of the paints allows for the coil-coated material to be shaped in many ways.

Reynolux® helps you make your imagination come true – and optimally fulfil your clients' wishes.

Reynolux® can be used in many ways:

- Flashings
- Eaves
- Roof cladding (standing seam)
- Gutters

A first-class product for first-class roofs!

Reynolux® offers you creative possibilities in the field of roofing, where far too many projects settle for the standard options. It can be coated with a unique variety of coating systems. Even small batches can be delivered in any colour desired.

For new constructions as well as renovation of old buildings with weak roof trusses, the use of aluminium as a material is constantly gaining in importance. The numerous benefits of aluminium are winning over the hearts and minds of more and more contractors, roofing firms as well as dealers in roofing materials.

Three factors are crucial for architectural applications: aesthetics, durability, and processing. Reynolux® fulfils all these requirements in grand style.

- Reynolux® allows for perfect harmony with the building's architecture. Its flexibility in application allow for attractive combinations with other materials.
- Reynolux® is rated to endure long-term temperatures between – 50 °C and + 80 °C and can withstand even the hardest mechanical stresses for roofing elements. It more than meets the requirements generally placed upon exterior architecture.
- Reynolux® can be machined through all current processing methods and is quick and easy to mount. The ideal material temperature for the machining of Reynolux® should not be below 20 °C.

Reynolux® is a pre-painted aluminium sheet manufactured through coil coating process. The process allows for the application of one or more coats of paint, all in uniform quality and without colour deviation. Production is continuously accompanied by strict quality controls.

Examples for dual coating:

The benefits of Reynolux® at a glance:

- Certified quality based on ISO 9001 and 14001 as well as membership in the ECCA*.
- Through exceptionally short lead times, our commitment to meeting delivery deadlines as well as our quick reactions allow us to forego large stocks.
- We possess extraordinarily flexible production capabilities and can deliver small amounts and special colours.
- We provide up to 20 year guarantees in the roofing field.
- We stand by your side through all stages of project implementation, from planning to completion.
- With our joint offerings from Reynobond® and Reynolux®, we provide you a competitive edge during the acquisition of new projects.
- We offer the largest selection of coating systems on the market. The innovative DURAGLOSS® paint system is available exclusively from us.
- Alongside standard colours, we also offer any colour desired.
- Our on-going research and development assures a constant supply of the products that the market demands.

* ECCA: European Coil Coating Association
